

Conduikt

Multi-Agent AI Marketing Automation

Olayinka Fagbenro · Founder Startup Visa Application · July 2026

The marketing stack is broken for SMBs

SMB marketers and agencies spend **60–80%** of their time on repetitive content and campaign work.

The problem isn't AI quality. It's **fragmentation**.

- A writer in one tool, a scheduler in another, an audit in a third
- Performance data lives in a fourth, never feeds back into the first
- 10+ apps stitched with manual handoffs
- Output quality is inconsistent because data doesn't flow between them

The result: founders running their own marketing burn hours on context-switching instead of building product.

One platform. 18 agents. A closed loop.

Audit → Generate → Publish → Analyze → Improve

- 18 specialised agents today — SEO audit, content strategy, copywriting, social, email sequences, campaigns, A/B tests, programmatic SEO, growth playbooks, more
- Agents share research, brand voice, and performance data — no patchwork
- The **closed-loop analytics layer** shipped in Week 2 — engagement data automatically informs next week's generation. The loop tightens as each channel accumulates signal
- Built for the founder who is also their own marketer — the buyer enterprise tools ignore

Marketing automation TAM

38%

CAGR for AI marketing subset

32M+

SMBs in EU + US underserved by enterprise platforms

HubSpot, Marketo, and Adobe sell **up-market**. The floor is open — and the SMB / agency segment is the fastest-growing AI marketing buyer cohort.

Why now

01 AI quality crossed the threshold

Claude 4 / GPT-4-class models produce marketing output that's usable without heavy editing — first time true at this price point.

02 MCP standard is emerging

Agents can finally cross product boundaries cleanly — the missing piece for multi-agent platforms.

03 SMB margin pressure is permanent

"Do more with less" isn't a 2024 trend — it's the new operating reality. SMBs need leverage tools, not more SaaS.

04 Agency margins are compressing

Clients want output, not hourly invoices. Agencies need a productivity multiplier that doesn't hollow out the deliverable.

The window: 18–24 months before enterprise vendors react.

GROSS MARGIN AT SCALE

~75%

Traction

Launched public beta **April 2026**. Early stage — current focus is validating the loop with the first 20 customers before opening broader acquisition.

PRODUCT

- **18 production agents** shipped across audit, content, publishing, analytics
- **Closed-loop analytics layer** shipped in Week 2 — automated engagement analysis feeds into next week's generation (novel in the SMB AI-marketing category)
- **4 live customer testimonials** from SMB operators — Dara Sobayo, Adeola Owoade, Olatunbosun Olalekan, Oluwatobiloba Olajide (visible on conduikt.com)
- Dogfooded — Conduikt's own marketing runs through Conduikt

BUILD-IN-PUBLIC MOMENTUM

- **14-day launch playbook** currently running on X ([@olaDmenace](https://twitter.com/olaDmenace)) — Conduikt agents writing + scheduling every post
- Daily public commits to [olaDmenace/conduikt](https://github.com/olaDmenace/conduikt) — every fix, every learning visible
- **Free-access pilot** open to select agencies (white-label reports + bulk content) as the wedge to 100 paying customers
- Committed to publishing calibration data — the honest signal a Startup Visa committee can actually verify

Competitive landscape

COMPETITOR	WHAT THEY DO	WHERE THEY STOP
Jasper · Copy.ai · Writesonic	AI writing	Generate only — no audit, publish, or analytics loop
Surfer · SEMrush · Ahrefs	SEO tooling	SEO-only — no content generation, no publishing
HubSpot · Marketo · Adobe	Enterprise marketing	Heavy, expensive, slow — wrong shape for SMB / agency
n8n + Claude (DIY)	Generic automation	Requires building every workflow from scratch

Conduikt's wedge:

Multi-agent

SMB-first

Closed loop

Nobody else has all three. The closed-loop piece — performance data automatically feeding next week's generation — is genuinely novel today.

Go-to-market

PHASE 1 · NOW

Founder-led, build-in-public

- 14-day launch playbook on X + LinkedIn — Conduikt running its own marketing
- Direct DM outbound to solo SaaS founders (the ICP)
- Target: first 100 paying customers by month 6

PHASE 2 · MONTHS 6–12

Agency partnerships

- White-label reports + bulk content as the leverage angle
- One agency = 10–40 underlying SMB seats — force multiplier
- Target: 20 agency partners by month 12

PHASE 3 · YEAR 2+

Product-led growth

- Free tier → paid conversion via natural usage limits
- Organic SEO compounds the audience built in Phase 1
- EU enterprise tier once GDPR-native positioning is market-tested

Team

Olayinka + Segun · 10-year working relationship, first company built together

Olayinka Fagbenro

Founder & CEO · Engineering

Lagos, Nigeria — relocating for full-time build

- 8+ years senior frontend engineer
- Currently leading frontend at BamBam Automation
- Domain depth in agentic AI workflows, MCP integration, marketing automation
- Building Conduikt since February 2026 — every agent, the full stack, the brand
- Public track record on X (@olaDmenace) and conduikt.com

Segun Kadri

Co-founder · Customer Success + Ops

Lagos, Nigeria — remote co-founder

- 8–10 years in technical support & customer operations
- Currently at Mquid
- Founded Computermindz Technologies
- Owns customer success, QA, and technical operations at Conduikt
- 10 years working alongside Olayinka — first company built together

Cap table: **Olayinka 85%** · **Segun 10%** · Early hire pool **5%**

Vision · Year 3

Conduikt is the **opinionated marketing operating system for SMB founders** — the AI marketing team a solo operator hires before they hire a marketer.

Product

Every SMB agent workflow — audit, generate, publish, analyse, improve — visibly self-improving from real performance data. Loop closes in every account, weekly.

Customers

1,500+ paying SMB accounts across SaaS + agency segments. Median customer runs 3+ channels through Conduikt from day one.

Revenue

\$2M ARR run-rate, 75% gross margin, cash-flow positive. Funded predominantly by revenue and one strategic round on our terms.

Team

Team of 8–12 — engineering, growth, customer success — across a founder-led HQ plus remote operators. Zero-agency, product-first culture.

Category signal

"Closed-loop AI marketing" is the recognised alternative to generic AI writers. Conduikt is the reference implementation of the category.

The bet

SMB marketing gets a productivity multiplier the enterprise never had — because the enterprise never needed one. That's the wedge, played to compound.

Financial projections

12 MONTHS

\$0 → \$200k ARR

- 200 paying customers
- ~\$83 blended ARPU (mix of Pro + Growth + Agency)
- 75% gross margin at scale

36 MONTHS

Path to \$1.5–2M ARR

- Contingent on hitting agency acquisition targets
- 1,000–1,500 paying customers
- Cash-flow positive month 28 in the base case

*Base case: **organic content marketing only**, no paid ads, no significant hires before month 10. Upside scenarios with funded paid acquisition land materially higher.*

Use of resources

Full-time founder focus

No consulting day-job split. 100% of working hours on Conduikt — the fastest single accelerant.

Regional customer development

Direct, repeated, in-person meetings with SMB operators in the target market — reachable in a single workday from the visa destination.

First technical hire

Month 10. Agent infrastructure or product engineering. Sourced from the local talent pool at the visa destination.

Local LLC incorporation

Local LLC established during the standard post-arrival window once residence permit and e-signature land. Clean cap table for the first institutional round.

Data-regulation-native sales

A locally-incorporated SaaS unblocks enterprise deals US-headquartered competitors can't easily win.

Community access

Regional accelerator + startup community access — the founder and customer ecosystem to compound the next 18 months.

The ask

Startup Visa to relocate full-time and build Conduikt with the founder on the ground at the visa destination.

12-month initial temporary residence permit, extendable up to 2 years.

Intent to establish a **local LLC during the standard post-arrival window** and build long-term from the destination country.
